

Math – One/Two More and Less

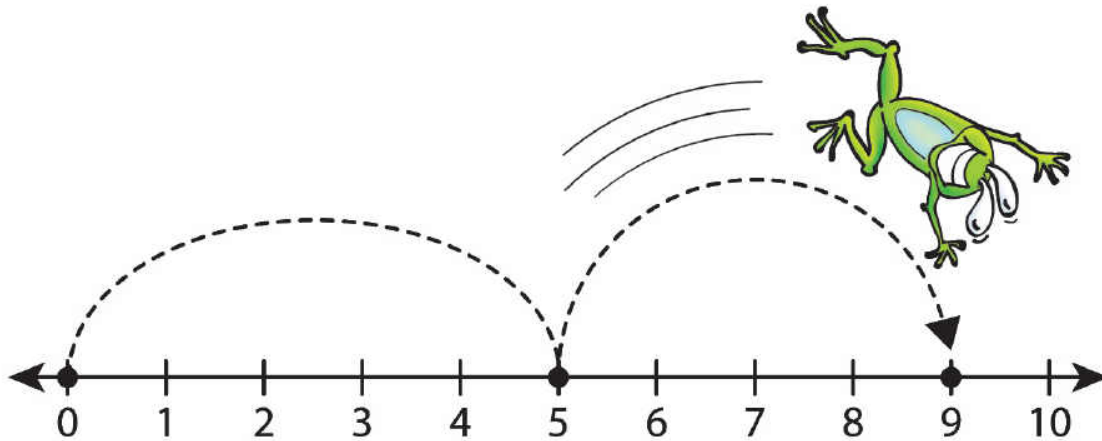

Please help to support your child with the following examples:-

You could use counters/buttons etc or a number line (as shown) to find the answer. Strategies of hopping forward for more, hopping backwards for less will help your child. Consider the strategy of hopping forward, adding more, you go left to right as in reading, you are adding more words adding more in number.

One less of five Two more of four One more of three

Two less of seven One more of eight One less of one

Two more than three One more than six etc.

Once mastered 1-10, create a number line to 20 and find one/two more one/two less of any given number.
