

Bubblegum Math

I will send a note home once this program is initiated.

The objective of this program is to improve the speed and accuracy of **basic facts to 20**.

When your child learns a set of basic facts without hesitation, your child will take a written quiz consisting of twenty questions on addition and subtraction facts studied for the week.

When your child achieves **18 or higher out of 20** in the allotted time span, he/she will colour in a gumball on their 'gumball machine' and receive their next set of basic facts to be studied.

If your child receives 17 or less on the quiz, he/she will need to continue practicing those same facts for the following week. They will be given a different quiz when they are prepared.

Please note that **your child will only be tested on their basic facts if it is written in their agenda that they are prepared**.

Thank you,

Mrs. Douglas
