

Science Unit 1 - Magnetism

What I need to know!

These "I can" statements will be assessed by the student and the teacher on an on-going basis during the unit.

- I can talk about how a magnet will behave when it is near another magnet or near a different material.
- I can show where and why magnets are used in the real world.
- I can explain why magnets attract some things and repel others.
- I know that magnets have polarity. The poles either attract or repel each other.
- I can explain a rule for polarity.
- I can design and construct something that uses a magnet.
- I can show how a magnetic field works.
- I can talk about the strength of different magnets.
- I can make predictions about how things will react around a magnet.
