

Unit 4 Measurement

Overview

Children will explore telling time to the nearest minute using digital and analog clocks, reading and recording calendar dates, and finding area in square centimeters and square meters.

Students will be able to:

- Tell time to the nearest minute using 12-hour and 24-hour clocks.
- Read and record the date in various formats.
- Estimate and measure area.
- Construct different rectangles for a given area.

Vocabulary for the unit:

analog clock, digital clock, elapsed time, 24-hour clock, units, area, square units, square centimeters, square meters
